# Differences Between MDM, EMM, and UEM

As hybrid and remote work has expanded, so has the necessity of mobile device and endpoint management to ensure your organization's mobile environment is secure and optimized. Yet with the increasingly complexity of mobility management,
how do you know what solutions are right for your organization?

Three key mobility management solutions to consider are Mobile Device Management (MDM), Enterprise Mobility Management (EMM), and Unified Endpoint Management (UEM).
Below are their differences and how each benefits your organization.

	Mobile Dev Management (MDM)	Enterprise Mobility Management (EMM)	Unified Endpoint Management (UEM)
About	Manages mobile devices, data, and provides enhanced security	Manages everything that MDM does, with advanced control of applications	Manages all EMM does, plus desktop management for operating systems, applications and data
Features	• Remote Management • Application Management & Data Control • Resource Provisioning	• MDM features • Separation of corporate and personal data • Mobile Identity Management • Mobile Application Management • Mobile Content Management	• EMM Features • Updates across mobile and desktop devices • Smart device management (IoT, printers, kiosks etc.) • Single, secure solution to manage all devices
Devices Covered	Smartphones, Tablets	Smartphones, Tablets	Smartphones, Tablets, PCs, Smart devices

Whether you are considering a robust UEM platform or looking to manage your smartphones and tablets with MDM, managing the software can be a burden for your IT department.

Wireless Watchdogs managed mobility services off-loads from overburdened IT organizations the strenuous task of managing mobility software and securing corporate- and employee-owned devices. Our managed services/strategies are designed to create a multi-layered suite of security features around all major mobile device platforms, providing a single and complete window of control for all company information transmitted through corporate or personal devices.

UEM
